Hard facts LU

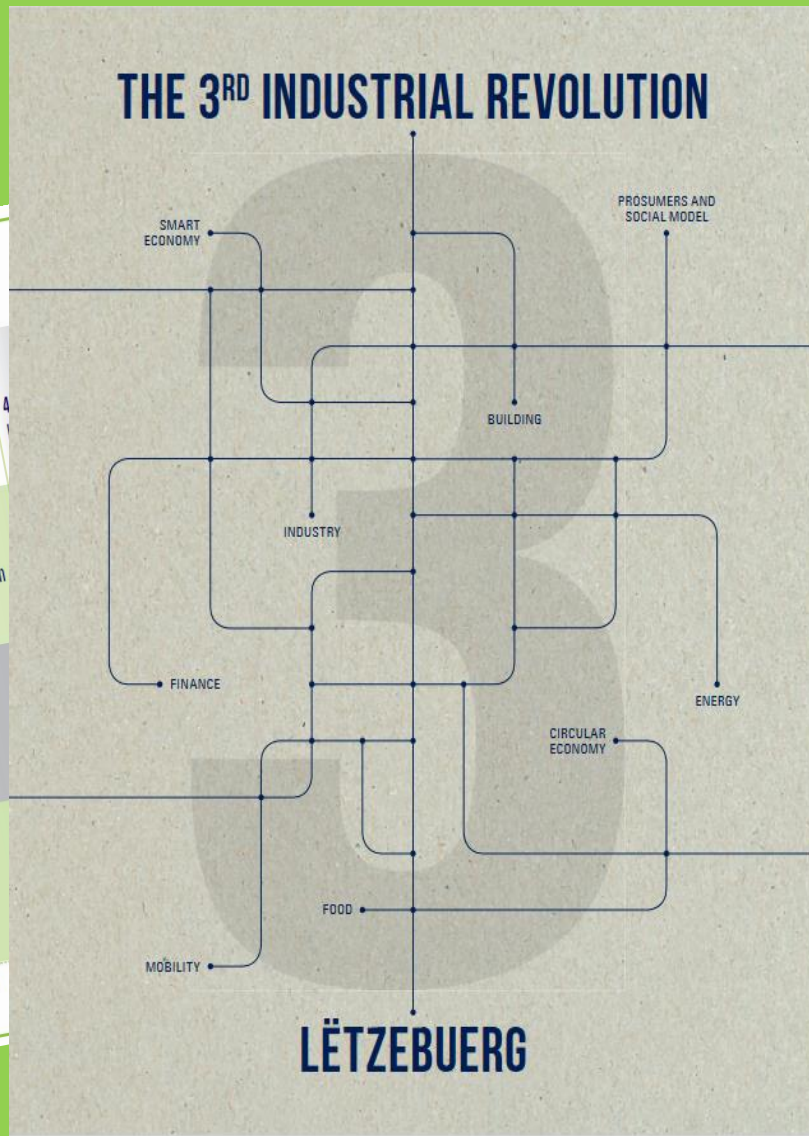

Evolution of total, Luxembourgish and foreign population on 1st January

Frequency: Annual

Specification	Time period	2018	2019	2020	2021	2022
Total population *		602 005	613 894	626 108	634 730	645 397
· Luxembourgish *		313 771	322 430	329 643	335 304	341 230
· Foreigners *		288 234	291 464	296 465	299 426	304 167
Proportion of foreigners (in %) *		47.9	47.5	47.4	47.2	47.1

Shared vision

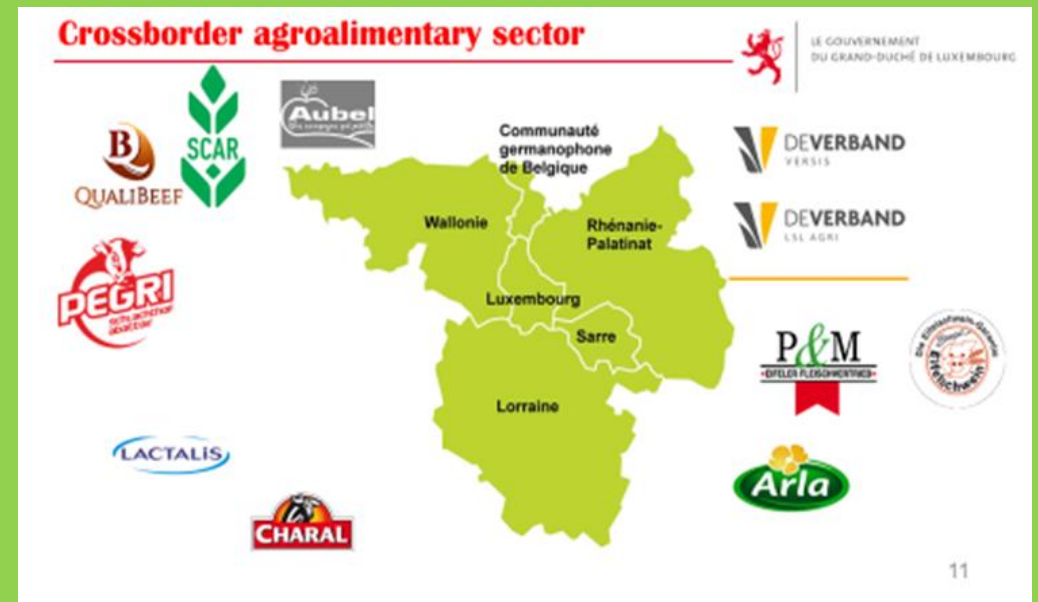

A poster for a conference. It features a stylized graphic of a network of lines on the left. The text is in French and includes the title of the conference, the location, and the dates.

2ème CONFÉRENCE PUBLIQUE ANNUELLE

L'économie réelle : entre fondations sociales et limites biophysiques

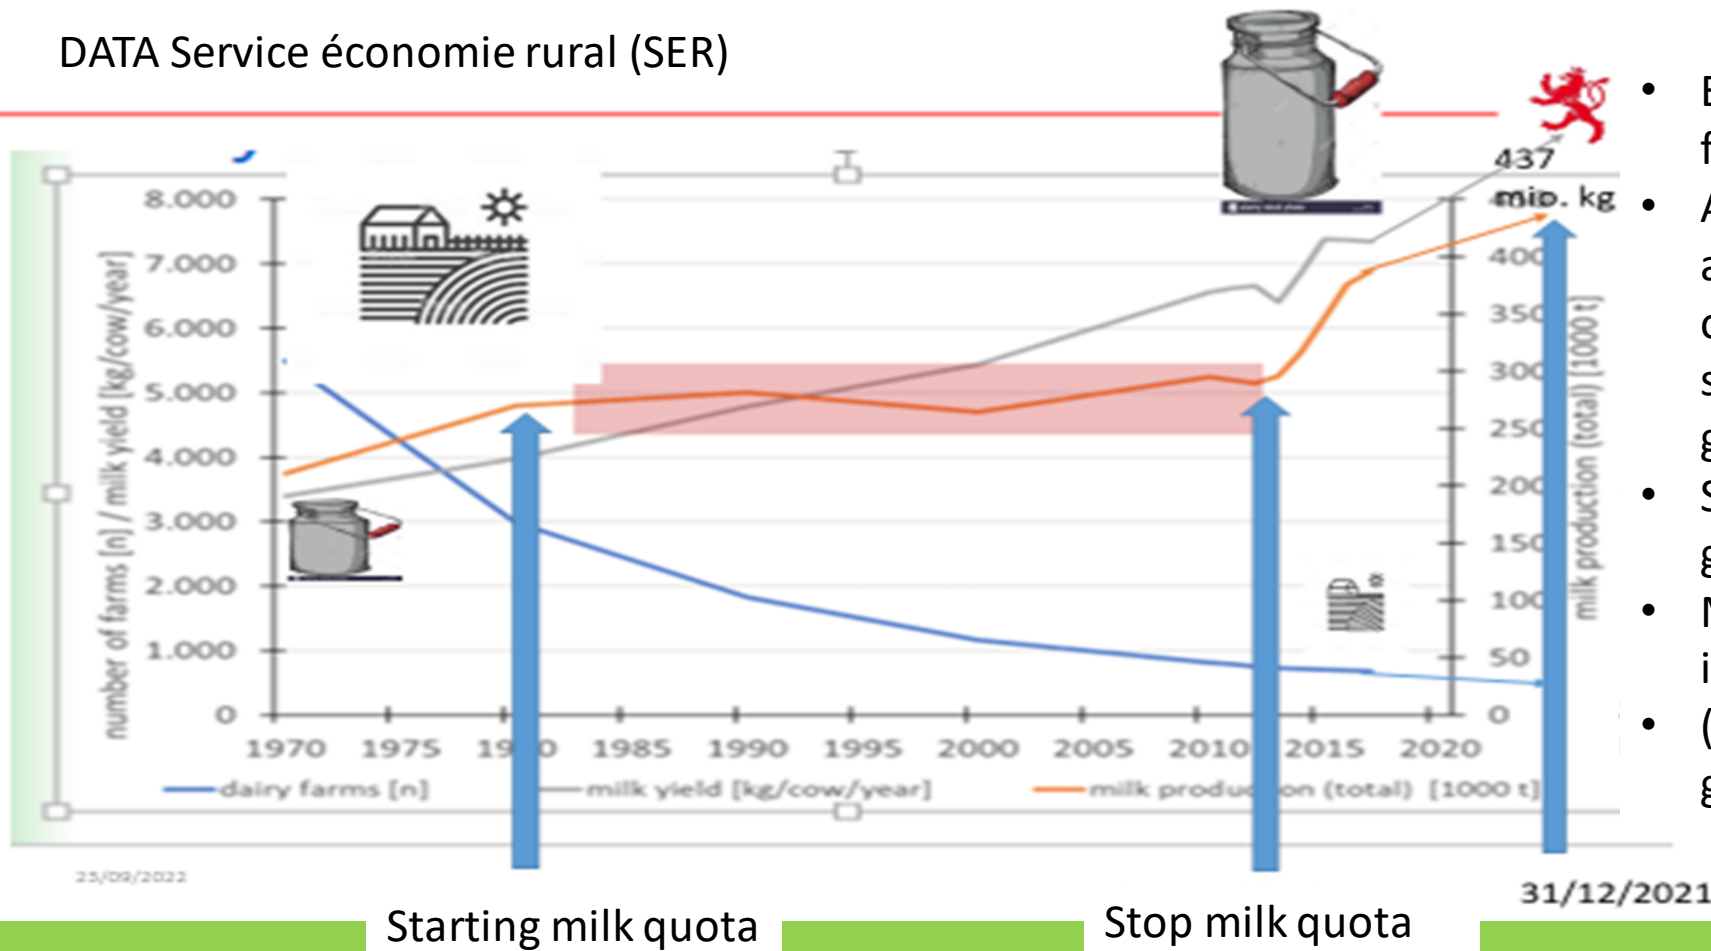

Maison des Arts et des Étudiants,
Esch-sur-Alzette & Cisco Webex
17 et 18 octobre 2022

Agriculture facts LU

Actual situation LU farms

DATA Service économie rural (SER)

- Every 25 years number of farms reduced by 50%
- Actually half of the farmers are more than 54 years old, on half of the farms succession is not guaranteed
- Succession mainly guaranteed on dairy farms
- More than 75% of the milk is exported
- (short Agri supply chain goals?)

PAN BIO 2025

OBJECTIVE

PILLARS AND MEASURES

INNOVATION AND RESEARCH

PAN-Bio 2025 defines four strategic pillars*:

- **01.** taking stock of the current situation of the organic agricultural sector in Luxembourg in order to take targeted action.
- **02.** improving the visibility of organic farming within the different population groups in order to boost sales.
- **03.** increasing the attractiveness of organic production methods for producers in order to certify more areas.
- **04.** developing and establishing different production, processing and marketing channels to increase supply and demand.

- 4 Objectives
- 29 Actions
- Short term 2020-2021
- Middle term 2022-2023
- Long term 2024-2025

Objective 4

- For measure 4-1: developing and strengthening local/national/regional supply chains from primary production to the final product (Farm2Fork approach), this by considering the reality of a geographical “small” country like Luxembourg
- For measure 4-5: increasing organic products, products of conversion farms, regional and seasonal products in collective restorations, this by offering schooling sessions to the key workers in these institutions, informing about the avoiding of food waste, changing purchase habits, adapting menu’s to a sustainable approach.

Example community canteen

Pilot projects in different public canteens

- Collecting data
- Fixing goals
- Review of results/Paying of surcosts

Lessons learnt out and consequences out of the pilot projects

- Analyzing the problems out of the pilot projects
- Developing of training units (increasing organic food) on the menu and avoiding food waste
- Offer of paying those training units to the interested parties (cooks and staff in canteens, policy makers/council members/people in charge of budget and payments)

Thanks for your attention!
