# Forest Map vs light pollution map

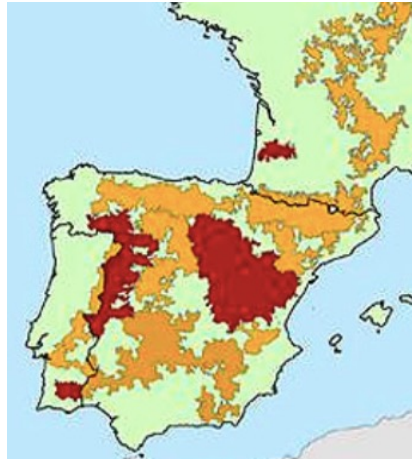

The Forest Rural world must  
be a world of opportunities

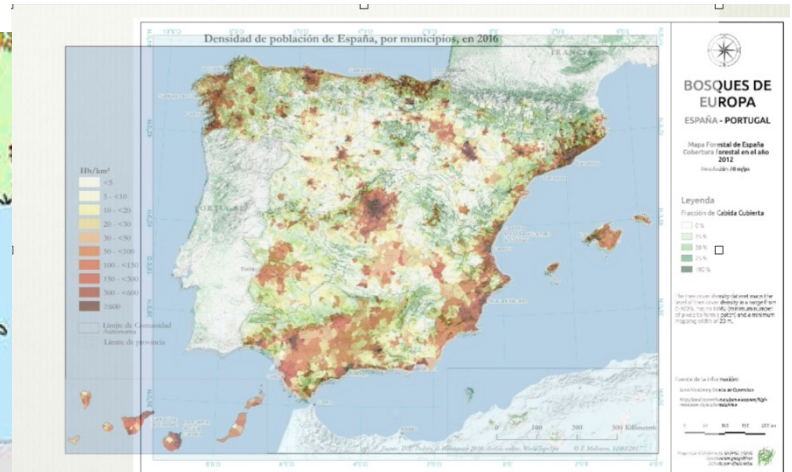

*It is not the lack of resources that kills our forest territories*

Mapa de población y forestal superpuesto.

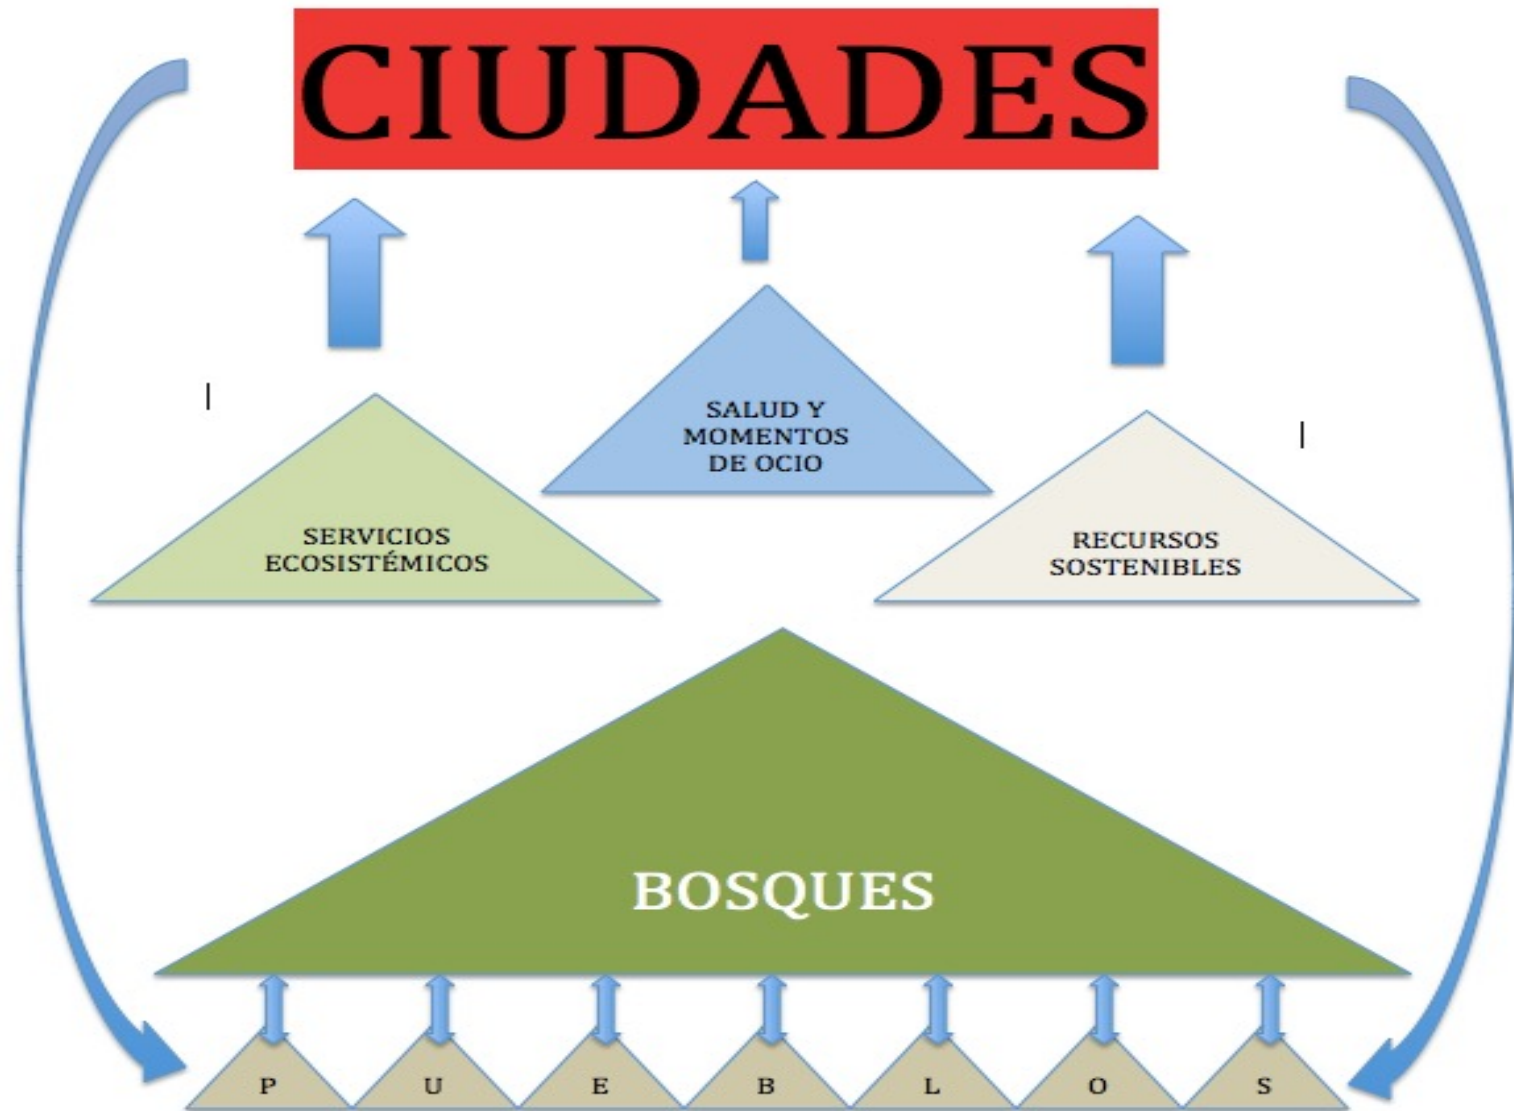

***IT IS THE LACK OF OPPORTUNITIES***

The deep, necessary and cultural link between local populations and forests is in danger.

This situation seriously compromises the future of forests and with them, sustainable resources and ecosystem services.

M. Corella 2023

There is a great imbalance that endangers our forests

# OREA WORKSHOPS

**Rural world, a  
World of opportunities  
2017**

**Woman and Forests  
2019**

**Orea was the national site of  
the international day of forests  
2022**

**Our Forest  
Our Future  
2018**

**Our Forest, Our  
Future**

**National network of  
Celtiberian municipalities  
2022**

The rural world was the precursor of the **BIOECONOMY** and **THE CIRCULAR ECONOMY**, but it's never been recognized

Resinous pine chips

Natural Fertilizer

**Our Cattle are  
necessary for  
the forest, but  
the CAP hasn't  
recognized  
pastures under  
trees**

## For our (~~forests~~) future

- ◉ Empowerment of local communities linked to forests.
- ◉ Research, innovation and investment to preserve these communities.
- ◉ There has to be a recognition of ecosystem services, economically and socially towards these communities.
- ◉ It is extremely necessary to reactivate forest management, because Right at this time of climate change we have the most vulnerable forests in our history.
