

Group 1

Peer exchanges and learning between MS on how CSP implementation could be successfully applied

Key practical issues

Limited participation due to different reasons, these should be tackled.

Time limitation. Short time to adopt the changes, consultation. Farmers point of view is to have everything on time to adapt these changes. COPA COGECA

Restriction of resources. Pillar 1, LEADER mainstream, implementation of CAP-Agri. Broader spectrum needs more people. VLK DE

Monitoring Committee can be used in a more effective way. Be more creative. SE.

MC is not the only entity that have a say about it. Also National Networks, regional/local organizations, PA, etc. These channels should be open so these issues should be got to the MA.

Transparency of the composition of the MC. VLK DE

Clarity of the roles (NL)

Expectation for National networks. Some NN don't have the resources. Capacity building for NN would also be important.

Need for capacity building - BirdLife

EU Code of conduct allows institutional support to MC. However, there is no feeling that this has been used. BirdLife.

EU Guidelines that clarify how MC should work - not only code of conduct. BirdLife.

Actions through networking and engagement to support CSP implementation

Consistent approach to reaching out to farmers. MA should be partnering up with farmers organisations and reach even remote communities with specific problems to address. RO - APPR

Have a system to share good practices. Raising the bar to the performance of Monitoring Committees. BirdLife.

Use other channels such as Social Media, podcast - to explain technical aspects of implementation. RO - APPR

COLLABORATION. The organisation has managed to involve MA in their activities. RO - APPR

Supporting newcomers (get into the system) but also well-established stakeholders (adapt to the change). ERCA

Struggle to comply with regulations have a negative impact on mental health of farmers. Specialized training can help people deliver these services. ERCA

Communication and capacity building with newcomers. Simplified and clear communication. EE NN
