

Good Practice Workshop

FINAL AGENDA

Addressing data gaps to evaluate CAP Strategic Plans

8 – 9 June 2023
Sankt Gertrud Konferens
Östergatan 7B, 211 25
Malmö, Sweden

European Evaluation Helpdesk for the CAP

The CAP for the 2023-27 programming period will see evaluation data requirements evolve as assessments must consider new evaluation elements and factors of success, as laid out in [Annex I of the Implementing Regulation](#) of Regulation (EU) 2022/1475, as well as indicators required for assessing the contribution of Strategic Plans (Article 6).

[Evaluation plans](#) aim to tackle this challenge through the dedicated 'data and information' section, which can determine the availability of data needed at the required level of disaggregation (national, regional, local) and in the desired format. However, EU Member States may still face issues on identifying and accessing the needed data sources as well as the management and governance of this information.

Aims of the workshop

The Good Practice Workshop in Malmö will gather and share practices on how to identify and overcome data gaps obstructing the evaluation of CAP Strategic Plans at the national- and EU-level. The workshops' specific objectives are to:

- Exchange practical experiences on how to ensure data availability for evaluation, including useful data sources and institutional arrangements for data provision and quality control.
- Share experience and knowledge on approaches and methods for the identification of data gaps and ways to address them.
- Provide an opportunity for networking and identification for further support (methodological, capacity building) in relation to identifying and addressing data gaps.

Target audience

The workshop will be an opportunity to bring together Managing Authorities, Paying Agencies, evaluators and other CAP evaluation stakeholders involved in data management and information activities, such as National Networks and other data providers. Experts in data management processes and systems may also participate. The working language will be English.

Outcomes

A final report and speaker presentations from the workshop will be published on the EU CAP Network website, when available.
