NAZIONALE  
2014-2020**

**FEASR  
2014-2020**  
**Basilicata Europa**

## CERESO GOALS

Improvement of the existing production process through availability and validation of low-cost instruments for soil and crop monitoring.

Improvement of environmental sustainability through calibration of geo-electric sensors for soil and radiation sensors for cereal and rotating crops under different conditions suitable for sustainable management of the same.

Innovation through the creation of a modular platform for precision cereal farming in Basilicata.

Innovative and niche pasta and bakery products through the reintroduction of ancient wheat into cultivation and product innovation.

### Period of implementation

June 2019 - June 2021

### Budget

EUR 298,906.26
