

4th meeting of the CAP Strategic Plans Subgroup

Plano Estratégico da
Política Agrícola Comum

5 November 2024

Brussels

Best Practice Example

AXIS C - RURAL DEVELOPMENT - 2nd pillar of CAP

AREA C.2 - INVESTMENT AND REJUVENATION

C.2.1 - Investments in Agricultural Holdings

C.2.1.1 - Agricultural Productive Investment – Modernization

C.2.1.2 - Agricultural Investment to Improve Environmental Performance

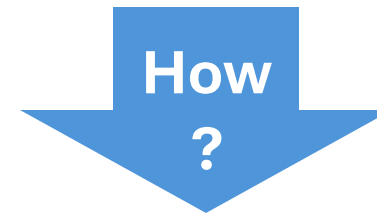

C.2.1.3 - Non-productive investments

What is the objective of this intervention?

Non-productive investments **contribute to strengthening** the realization of the specific **agri-environmental-climatic objectives** considered relevant:

- Sustainable management of **natural resources**,
- Protection of **biodiversity**
- Preservation of **habitats** and **landscapes**

- By eradication of woody **invasive species**
- Installation/recovery of ecological focus structures protection of **water and soil resources**
- Installing **nests** or **shelters** for birds of prey
- Installation of **bat shelters**
- Installation of protection systems against **wild predators** (with and without protected status)

This intervention contributes to the following PEPAC targets:

Percentage of farms receiving CAP support:

- For productive investments not related to the protection of natural resources
- That contributes to biodiversity

Beneficiaries

Individual person

or

Corporate person

engaged in
agricultural
activity

Access Conditions:

- The investment project must localize the areas to be benefited on the farm
- They fulfil the legal provisions applicable to the proposed investments
- The project must have a favourable authorisation from the relevant authority in the following areas of intervention:

1. Protecting and restoring biodiversity, habitats and traditional landscapes
 - stone support walls
 - riparian galleries
 - living hedges, rows of trees, bosques
 - protection systems against attacks by the Iberian wolf or wild boar
2. Protecting natural resources
 - strips of shrub or bush vegetation along contour lines
 - restoring stone retaining walls
 - vegetation protection strips on the embankments of drainage ditches

Examples:

stone support walls

bat shelters

riparian galleries in a river

The logo for the 2023-2027 Common Agricultural Policy (CAP) Strategic Plan (pepac). It features a stylized globe icon with the number '23.27' and the text 'pepac' in a bold, lowercase font. Below the logo, it reads 'Plano Estratégico da Política Agrícola Comum'.

Level of support:

Maximum amount of support in the total intervention: 27,6M€

Example: Restoration of stone walls

Non-reimbursable support for simplified costs:

Support: (€/m ³ wall restored)	Condition
130€	Located in the geographical “Peneda-Gerês”
200€	Located in the geographical “Douro demarcated region”

Support is limited during the programming period to a maximum eligible amount of €30,000, except in the demarcated Douro region, where the limit is €70,000.

Other typologies	100% non refundable counter invoice support
