MUDA O TEU TERRITÓRIO | CHANGE YOUR TERRITORY

Created at Baixo Alentejo, Portugal

A New Vision for Our Territory!

MUDA_TT+ is a collaborative non-formal education project created by a group of partners from different sectors in the Alentejo region!

The project was created from the need to communicate the potential of the region to young people, demystifying prejudices about the supposed underdevelopment of rural areas and sensitising them to the issue of rurality.

The initiative **strengthens territorial ties and a sense of belonging**, sensitising new generations to local opportunities and **encouraging their active participation**.

MUDA_TT+ adopts a **collaborative educational model, with co-creation and social innovation methodologies**, involving various agents for a multidisciplinary and innovative vision of rural dynamisation.

The project aims to valorise the rural world, especially in the Alentejo, promoting social cohesion through education and collaboration.

It transforms the region into a living learning laboratory, driving social innovation and entrepreneurship for sustainable development.

MUDA_TT+ is aligned with the principles of the New European Bauhaus, promoting a sustainable, inclusive and innovative rural development model.
