

# EU CAP Network Annual Work Programme Process

#CSPIimplementation

## Background information:

This process was designed in cooperation with all EU CAP Network strands and DG AGRI in order to propose a more coherent and timely process for the collection of inputs for the preparation of the AWP.

The **proposal was discussed and approved by the Steering Group in May 2025**. What was decided were the following steps:

- **Preliminary Input:** An initial online survey was launched for Assembly members to propose strategic priorities for the activities of the Network.
- **Screening & Preparation** – The Steering Group reviewed and clustered the proposed strategic priorities for the Assembly session.
- **Strategic Consultation** – The Assembly reviews and prioritises the proposed clusters, providing strategic guidance for selecting priorities to be taken forward.
- **Thematic Scoping** – Subgroups refine the selected clusters into more specific topics or thematic directions.
- **Policy Alignment & Drafting** – Topics are cross-checked with DG AGRI Units to ensure alignment with EU policy priorities.
- **Presentation & Validation (Steering Group)** – Selected topics are presented for feedback and validation.
- **Submission** – Final approval by DG AGRI and formal submission of AWPs by LOTs.
